

The right tool
for the right start,
all in one place

Maersk Inland Hub services – a combination of rail
solutions to get your supply chain moving the right way.

The right tools for every start with Maersk

Why do you need the right start?

It's simple. The right start makes the rest easier. It lays a foundation to build upon. Whether it's in your life or your logistics, we all want things to begin well.

So, how do you get the right start for your supply chain? Is it through first-mile services, the wider connection far inland, or in the flexibility to meet your budget constraints? Is it in the right logistics partner?

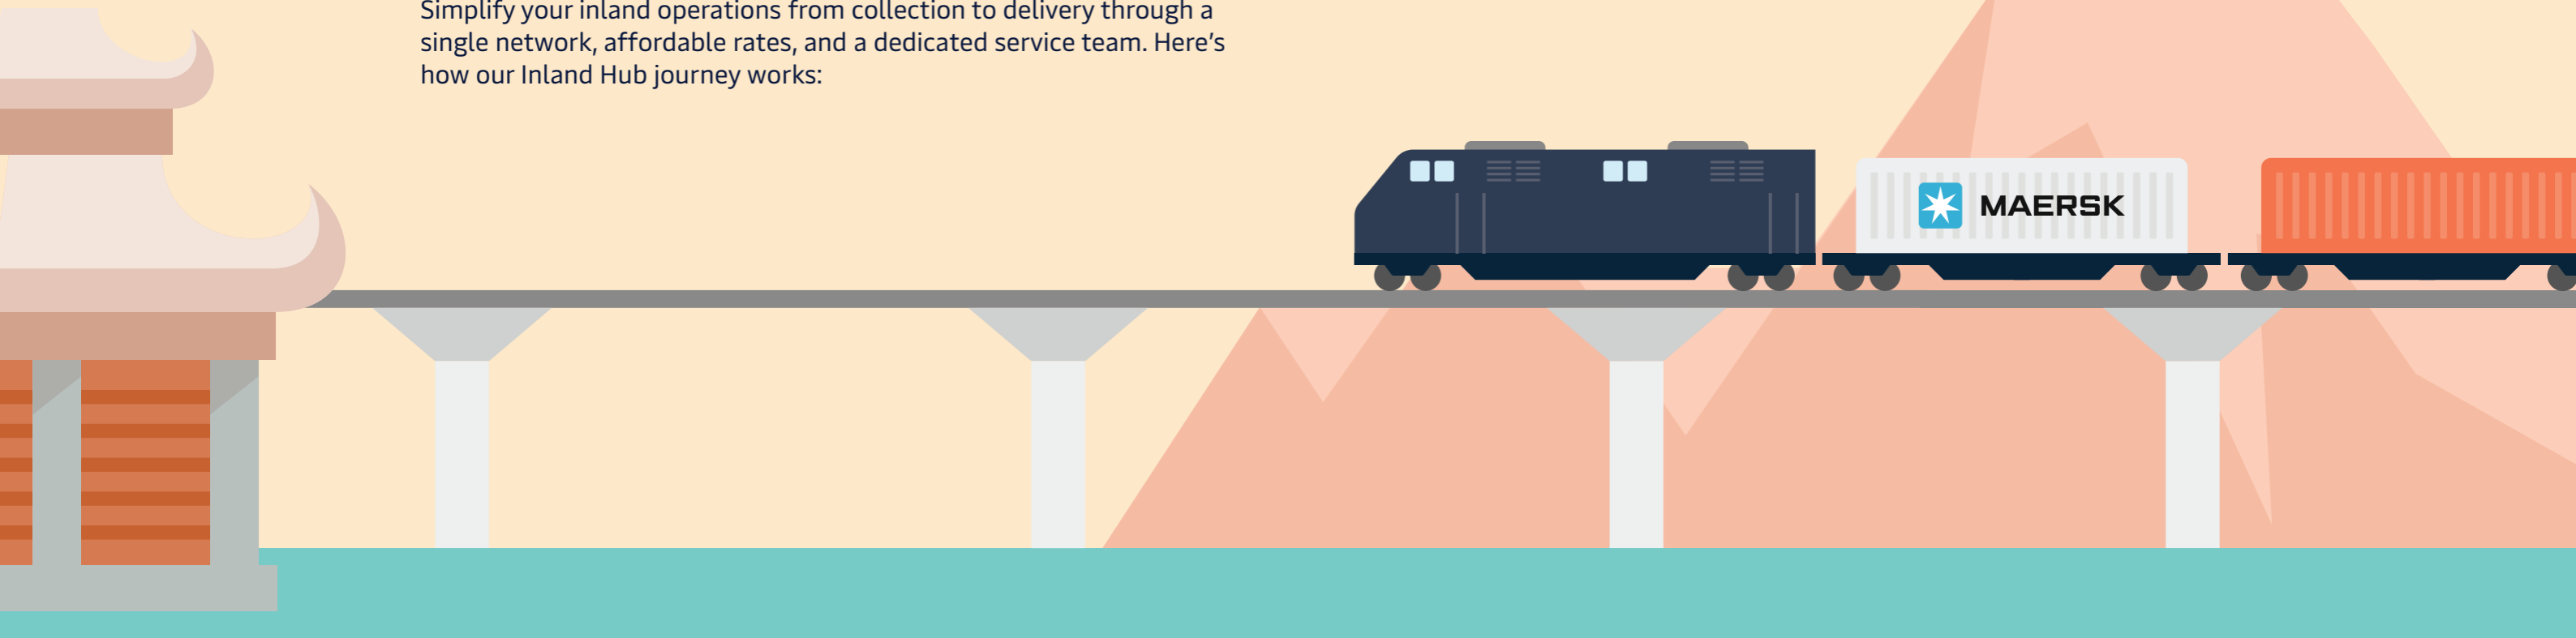

We believe the answer lies in all of them, and more. That's what we are offering with Maersk Inland Hub.

All the services you need to kickstart your ocean journey are now under one flexible and reliable inland solution. It's a system of versatile, dependable tools that can form the foundation of every successful cargo journey. From reliable rail coverage, cost-efficient plans and faster transit times, Inland Hub gives you the advantages and insights to keep you ahead.

Three steps to get you going

Simplify your inland operations from collection to delivery through a single network, affordable rates, and a dedicated service team. Here's how our Inland Hub journey works:

Step 1

Contact and Book

Contact our sales/customer service experts, and book shipment schedule.

Step 2

Collect & transport goods

Maersk offers first-mile trucking. Transports goods to the nearest rail hub.

Step 3

Deliver goods to ocean terminals.

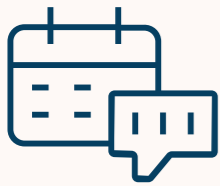

Maersk transports and delivers goods to barge/ocean terminals.

Solutions you can trust to always deliver

Maersk Inland Hub keeps your supply chain moving, offering solutions for short and long distances, dry or reefer cargos, urgent deliveries, and regular schedules.

Three reasons to choose Maersk Inland Hub:

Reliability to meet your flexible demands:

- Extensive rail coverage across East and North China with 50+ corridors connecting to six ocean ports
- Higher frequency of rail services every week with direct links to seaports without the disruption on the road

Economy even with multi-location sourcing:

- Save up to 30% with our rail services against any road transportation over a 500-kilometer journey
- Reduce potential detention and demurrage costs by directly picking up the containers at the nearest depots

Efficiency to meet every market opportunity:

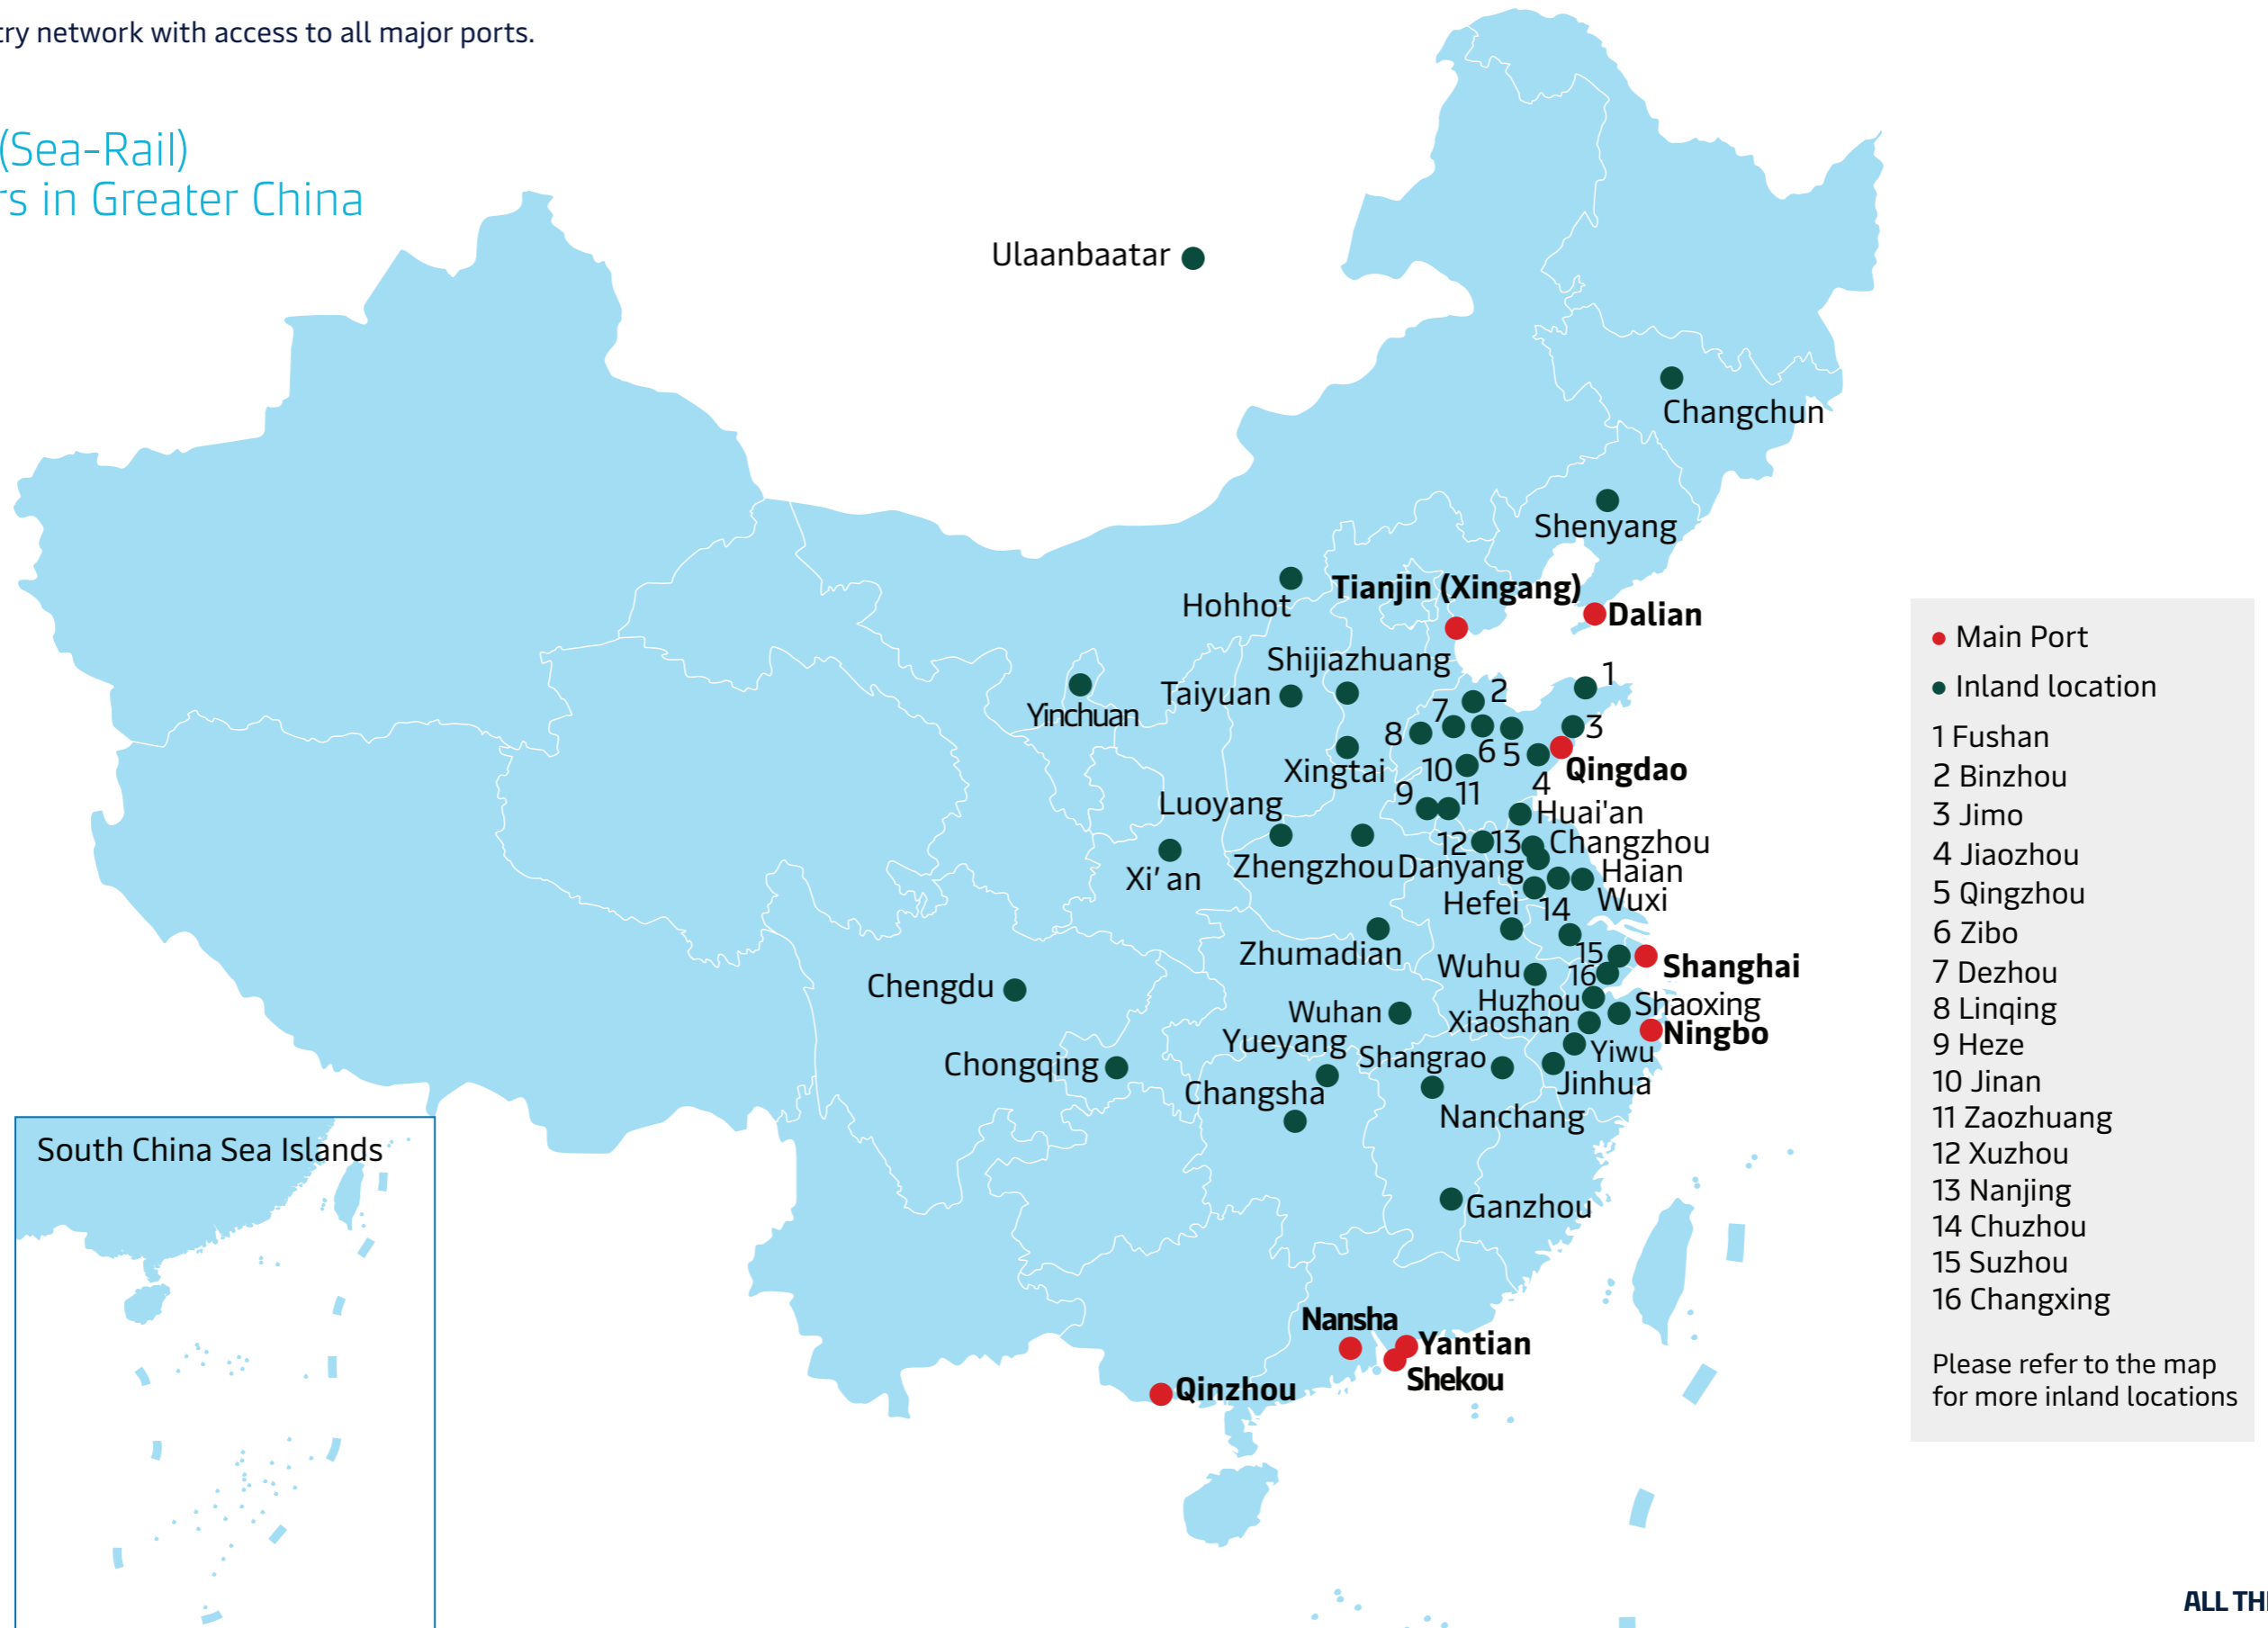

- Reduce transit time by nearly 75% against any barge transportation, and reach your customers faster
- Optional first-mile trucking services that can connect to the nearest rail ramps, saving you more time and resources

Our cross-country network accesses nine major ports

An extensive cross-country network with access to all major ports.

Inland Hub (Sea-Rail)
Corridors in Greater China

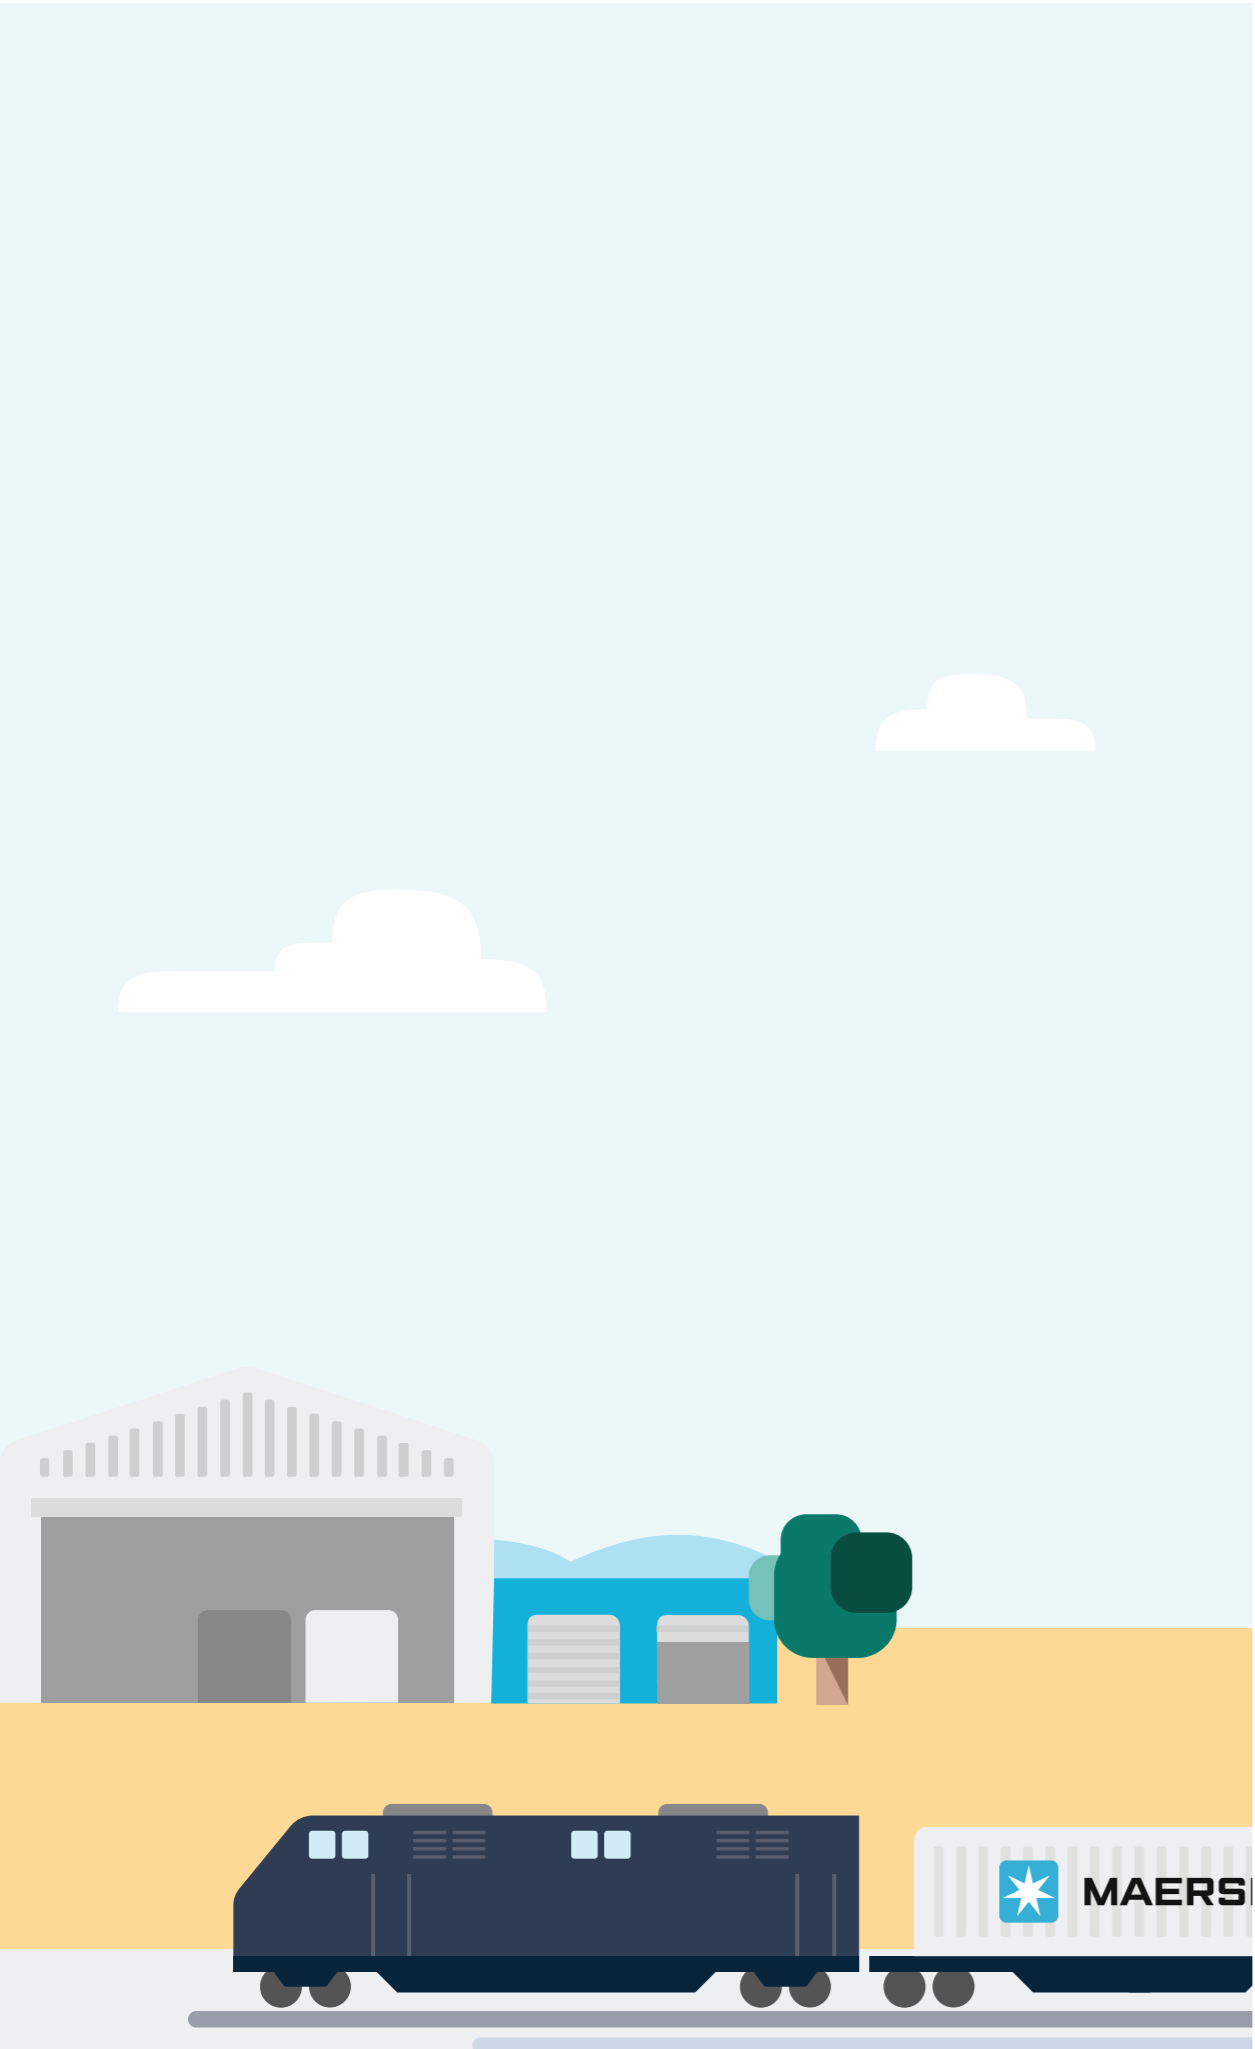

Our 80+ corridors link directly to major shipping ports for a faster connection between your inland manufacturing centres and the rest of the world.

North China
